

# SUBWAY SURFERS

## INTRO

Subway Surfers is a single player game in which has been developed by Kiloo. It is an endless runner game in which the main goal is to get away and avoid getting caught by the train inspector. While aiming to achieve this goal, also dodge incoming trains and other such barriers on the way.

Below we offer a few cheats, tricks and tips to help keep you ahead of the inspector and rack up high scores on the game's social network.

## HOW TO JUMP HIGH USING A JETPACK

In this game, players are able to jump high even by using a jetpack. Not many know about this but it is possible as long as the jump is made at the right time.

- First find a jetpack to use
- Fly around till the jetpack is out of fuel
- Swipe up quickly once you grab the last coin
- Jump up while still in the air
- This can help you land directly on top of a train

## STAY ON THE TRAIN AT MOST TIMES

It's best to do most of your runs on the trains instead of the ground since there are so many obstacles present on the ground, staying on the train increases the chances of avoiding getting hit by obstacles. Since the game also allows to change the direction of running mid-air, with a little practice, you can familiarize yourself with this move.

## VALUE YOUR KEYS

The key has many functions in the game. It's best to save as many as you can and use them wisely. In this game, you are able to revive your character during a run by using a key. However, this comes with some limitations, if you try to keep reviving your character in one run the price of the number of keys increasing and without realizing you might run out of keys in this manner. The best time to use a key is not during shot runs but during high scores when you have crossed all your previous scores and are aiming for another one.

## ALL ABOUT HOVER BOARDS

There are many types of hover boards available in this game. It's best to know each of their uses and specializations in order to be able to use them best. Normally hover boards last 30 seconds in this game and they are not usable anymore in those 30 seconds if you get hit.

Here is a list below, which shows all the hover boards available and their abilities:

- |                       |              |
